- 9 Distribute & Study Project Materials
Programme Manager & Team Leader
- 10 Conduct Program
Urban Planning Advisory Team
- 11 Complete & Edit Draft UPAT Report
Team Leader & Local Coordinator
- 12 Approve & Publish UPAT Workbook
ISOCARP Programme Committee

ISOCARP
International Society of City and Regional Planners

ISOCARP is a global, non-governmental organisation, a network of professional planners recognised by the United Nations, UNESCO and the Council of Europe. Members are planners and other stakeholders involved in the development and management of the built environment.

The objectives of ISOCARP are to improve cities and territories through planning practice, training, education and research. ISOCARP promotes the planning profession in all countries. ISOCARP leaves its focus on being a politically and contextually independent network of professional planners.

UPAT
Urban Planning Advisory Team

The objective of an ISOCARP Urban Planning Advisory Team (UPAT) is to offer the extensive planning knowledge and experience of ISOCARP members to provide expert and independent advice to local and regional authorities and communities in a particular urban or regional topic.

Projects
11 Urban Planning UPATs since 2004

Topics
Urban Planning & Community Development

Connecting Cities
Settings of Architecture & Urbanism

City and Regional Planning
Mobility, Transport & Tourism
Sustainable Development
Research & Education
Assessment & Capacity Building
Housing & Urban Renewal
Disaster Preparedness & Recovery

The UPAT programme promotes and stimulates the active cooperation between regions and cities. The exchange of knowledge and experiences between regions and cities can help in finding solutions for profound problems and can assist in formulating strategic planning policies and visions for the future.

Team Members
Senior Planners, Young Planners, Team Leader, Programme Manager

UPAT VP: ISOCARP's Vice President is in charge of the program and represents the Executive Committee (EXCO) to the local / regional authorities and all interested parties. The VP defines the scope of the process and cooperates with the EXCO, local and regional Programme Manager and local coordinators.

UPAT Local Coordinator: The local member that is proposing the UPAT will usually be in charge of the general coordination of the process, before and during the activities. A Local Organising Committee (LOC) includes local counterparts.

UPAT Team Leader: Consisting of the area of expertise of the UPAT subject, the UPAT VP and the Local Coordinator will assign a report in the field on a regular basis to the Team Leader. The Team Leader is responsible for team coordination and final report presentation.

Senior Planner: Experts on relevant subjects will be selected to collaborate with the Team Leader, Local Coordinator, fellow Senior Planners and young Planners to complete a report during the project visit. UPATs usually include five or more Senior Planners.

Young Planning Professionals are selected by ISOCARP and local universities by the Local Organising Committee. Education in a planning-related discipline and its skills are desirable. UPATs usually include some YPPs.

UPATs (Urban Planning Advisory Teams)

The objective of an ISOCARP UPAT is to make available the extensive planning experience and expertise of ISOCARP members for international planning projects, programmes and policies. The UPAT is a "holistic" initiative that acts like the members of ISOCARP who highlight UPAT opportunities, and find sponsorship.

ABOUT ISOCARP

EXECUTIVE COMMITTEE

SCIENTIFIC COMMITTEE

The Jiangbei New Area UPAT Team paid their second visit to Nanjing from 29 October until 02 November 2013. During the first visit in August 2013 the team explored the planning area and the challenges to be solved in the planning area that stretches around 90 km north of the Yangtze River. Preliminary comments and recommendations were given to the Nanjing Urban Planning Bureau.

During the second mission the focus of the UPAT Team was more focused on specific locations and themes. One of the issues was how to deal with the existing industrial zone with heavy chemical and steel industries that stands in the way of future residential
