

ISOCARP

45th INTERNATIONAL ISOCARP CONGRESS
Porto, Portugal, 18-22 October 2009
Keynote Lecturer

Eduardo de Oliveira Fernandes

President of Energy Agency of Porto

Professor, Faculty of Engineering, University of Porto
PhD on Applied Sciences at the Federal Institute of Technology
(Lausanne, Switzerland) in 1973.

Devoting the last 25 years of his career to teaching, research, consulting and public activities on various topics related to energy and environment, he was the founder of a RTD group on Building Thermal Physics with major pioneering activities in Portugal on Passive Solar Technologies in Buildings, Indoor Air Quality, and Energy and Environment in the Urban Space.

Eduardo de Oliveira Fernandes was a representative in the Portuguese Government twice: in 84/85 having with the responsibility for Environment, including landscape planning and in 2001-02 with the responsibility for Energy. He was responsible for the energy concept of EXPO'98 in Lisbon, an urban space designed for 30-40,000 people.

He is author and editor of several books and author of over hundred scientific papers. He has been member of the scientific, advisory, steering or organizing committees of meetings all over world and given hundreds of oral presentations.
