Open call for students

Gdańsk University of Technology,
Faculty of Architecture,
Gdańsk, 20th October 2019

Dear PhD Student,

In the name of The Mentor & Student Research Lab’s team, we are very pleased to invite you to participate in the third edition of The Mentor & Student Research Lab (MSRL) titled "The Public Spaces of Tomorrow" and answer this call. MSRL is organized jointly by the Faculty of Architecture at Gdansk University of Technology, the International Society of City and Regional Planners (ISOCARP) and Brygada Urbanistyczno-Architektoniczna (BUA). As an established educational and research project (we invite you to read more on our website and attached brochure), MSRL will allow you to lead a dedicated team of students, in a research of your own design with the cooperation of a mentor.

The main aim of MSRL is to create a space for collaboration between professionals and students in the field of urban studies. MSRL aims to provide a framework for the exchange of experience of the mentors with the initiative and creative energy of young designers and researchers. For the student participants, MSRL gives a good chance to gain research experience in an international work environment with the mentor's support; and the PhD students lead and supervision. For the participating mentors and PhD students, the project creates an opportunity to conduct research in their field of expertise with the cooperation of a dedicated and enthusiastic team of local participants. The quality of the work is ensured through the supervision of the academic partners from the Gdansk University of Technology.

The project opens up during workshop taking place 5th - 7th December 2019 during which the students and mentors primary "match making" workshop in Gdansk, Poland. The meeting ends up with work objectives and topics and the online cooperation begins. Detailed topics are crafted together by each mentor and their research teams at the beginning of the project and will be developed in the following months. Results will be presented at the conference on the 24 - 25th April 2020 in Gdansk, and published in the form of a scientific paper. All scientific papers will be additionally distributed by ISOCARP in the form of a report. This year's edition focuses on the public spaces, and their role as key elements of future cities.
Each of this edition’s teams will consist of 1 international Mentor and 5-6 students. The time frame for the research is from the 5th of December 2019 to the 25th of April 2020. This project will be conducted entirely in English. Your commitment as a PhD Student will consist of:

• Coming to Gdansk, Poland for the first workshop in November 2019 to meet your team and start the research.
• Coming to Gdansk, Poland for the second workshop in February 2020 to work on the research.
• Virtual cooperation with the Mentor and the dedicated student team.
• Joining for the presentation during the student conference in April 2019.

Should you have any questions please feel free to contact me directly by writing to msrl3.0.org@gmail.com. We would be happy to answer all your queries.

If you are interested in this initiative please kindly send your application msrl3.0.org@gmail.com including brief information on the research areas of your expertise and that you would be willing to develop during the workshop; and your resume by the 4th November. A more defined research topic would be helpful, but is not necessary at this stage. This call for Students is open for all PhD students.

The students from Gdansk want to create an excellent initiative that gives a chance for personal development for both students-participants and mentors therefore in name of the MSRL team I count on you and your commitment.

Yours sincerely,

on behalf of ISOCARP:

Magdalena Draheim, Hanna Obracht-Prondzyńska,
Sławomir Ledwoń, Zeynep Gunay

The Mentor & Student Research Lab Team
