Knowledge for Better Cities
About

Founded in 1965, the International Society of City and Regional Planners (ISOCARP) is a global association of professional urban and regional planners. Our network brings together individual and institutional members from more than 85 countries, who work in the public, private, and nonprofit sectors.

With over five decades of accumulated knowledge and expertise manifested in both our members and within the Society, we initiated “ISOCARP Institute” as a research spin-off for generating and disseminating knowledge for better cities. ISOCARP has successfully organised annual World Planning Congresses with thousands of papers, articles and contributions, accruing a wealth of knowledge for cities and territories.

Centre for Urban Excellence
VISION
Make cities and human settlements inclusive, safe, resilient and sustainable through integrative participatory urban and territorial planning.

MISSION
Mobilise professional urban and regional planners to co-implement the vision enshrined in the Sustainable Development Goals and the New Urban Agenda by:

- promoting the planning profession, education and research, accessible for all
- representing and providing networks and communication channels for its members and partners
- developing urban and regional planning services and resources
- creating and sharing knowledge through meetings, projects and publications
How we contribute to the Global Agenda?

- ISOCARP promotes good health and well-being in policies, plans and designs (SDG 13)
- ISOCARP contributes to quality education and gender equality through training programmes and young planners’ workshops in both Global South and Global North (SDGs 4 and 5)
- ISOCARP promotes clean water, renewable energy, sustainable innovation and infrastructure, reduced inequalities, responsible consumption, climate action and protection of life on land and below water in city and regional planning, through its planning services, projects, publications, and World Planning Congresses (SDGs 6, 7, 9, 10, 12, 13, 14 and 15)
- ISOCARP invests in partnerships for the goals, e.g. by joining UN-Habitat’s Planners for Climate Action and co-implementing European projects, e.g. +CityxChange, ThinkNature (SDG 17)
- ISOCARP’s main focus, however, is the implementation of SDG 11 on creating ‘Sustainable Cities and Communities’, through the application of the United Nations New Urban Agenda (NUA) and UN-Habitat’s International Guidelines on Urban and Territorial Planning (IG-UTP), by providing a unique platform to turn inspiring planning practices into science and put theories into practice.

ISOCARP World Planning Congress

A unique yearly global forum where planning theory meets planning practice around a central theme

“ISOCARP World Planning Congress has more than half a century of tradition in bringing together the top international experts in the planning field. Hosted every year in a different part of the world, we discuss the most current issues that cities and regions are facing, and we look beyond. A global event not to be missed.”

– Sławomir Ledwoń, ISOCARP Congress Director 2013-2019
The Society’s main event is the annual ISOCARP World Planning Congress, which focuses on a globally significant planning theme each year.

Since 1965, the Congress has always promoted the creation and sharing of knowledge in the planning profession, combining a unique, triple perspective on theory, policy and practice. Held in a different city each year, the Congress is attended by some 500-700 local and international delegates for an action-packed programme from plenary sessions to technical tours, to networking events, to mentoring and focused seminars. ISOCARP has pioneered the focus of the planning profession on issues such as regional urban planning (1966), urban regeneration (1981), planning for land and water (1998), the creative economy (2005), low carbon cities (2009), climate change planning (2018), megacities (2019), and post-oil city (2020). The Congress is open to both members and non-members.
The goal of UPA Ts is to mobilise the extensive planning expertise of ISOCARP members in order to assist cities and regions with their projects, programmes, and policies on spatial planning, urban design and placemaking. UPA Ts are organised on demand, comprising both senior and junior planners, and they present their advice in a dedicated report and/or Plan Magazine.

Young Planning Professionals Programme

- Workshop to share knowledge, skills and experience in a multi-disciplinary approach
- Training to apply theory in practice to a complex planning challenge
- Network to meet leading professionals and grow a career
A particular focus and commitment of ISOCARP is on young generations through facilitating knowledge for better cities with the youth. Since 1991, the Young Planning Professionals’ Programme is a crucial component of ISOCARP’s dedication to promote and enhance the planning profession. The objective is to contribute to the knowledge base and improve skills of young professionals, the future leaders of our profession.
Publications

ISOCARP thematic publications support the Society’s goal to create and disseminate knowledge for better cities and territories. Worldwide Projects

Jointly with the ISOCARP Institute, the Society participates in a wide variety of collaborations, partnerships and consortiums worldwide, e.g. with the European Union, UN-Habitat, UNICEF, Planners for Climate Action and others.

In order to achieve more sustainable and resilient societies, Nature-Based Solutions are an important topic on the EU Research and Innovation policy agenda. The objective of the ThinkNature project is the development of a platform that supports the understanding and the promotion of Nature-Based Solutions.

+CityxChange is a smart city project funded by the EU Horizon 2020 Research and Innovation programme. It brings the two aspiring Lighthouse Cities Trondheim (NO) and Limerick (IE) together with their distinguished Follower Cities Alba Iulia (RO), Pisek (CZ), Võru (EST), Smolyan (BG) and Sestao (ES), to underline their ambition to achieve sustainable urban ecosystems that have zero emissions and establish a 100% renewable energy city-region by 2050.
