SESSION 01:

How inclusive can virtual planning be?

Mariana Fiuza

Public Sector Innovation Specialist Teresina
2030, Brazil

SESSION 02:

Can meaningful participation
take place on virtual platforms?

Annemie Wyckmans

Professor, Head of NTNU Smart Sustainable Cities
Norwegian University of Science and Technology

Javier BurónGarcia

Founder Colaborativa.eu

SESSION 03:

How can technology enable
virtual participation?

Troy Hayes

Founder & Managing Director
Troy Planning + Design, US/UK/NL

Lauren Ielden

Urban Planner
Troy Planning + Design, NL

ISOCARP Cyber Agora

“How to do inclusive planning with social distance norms?”

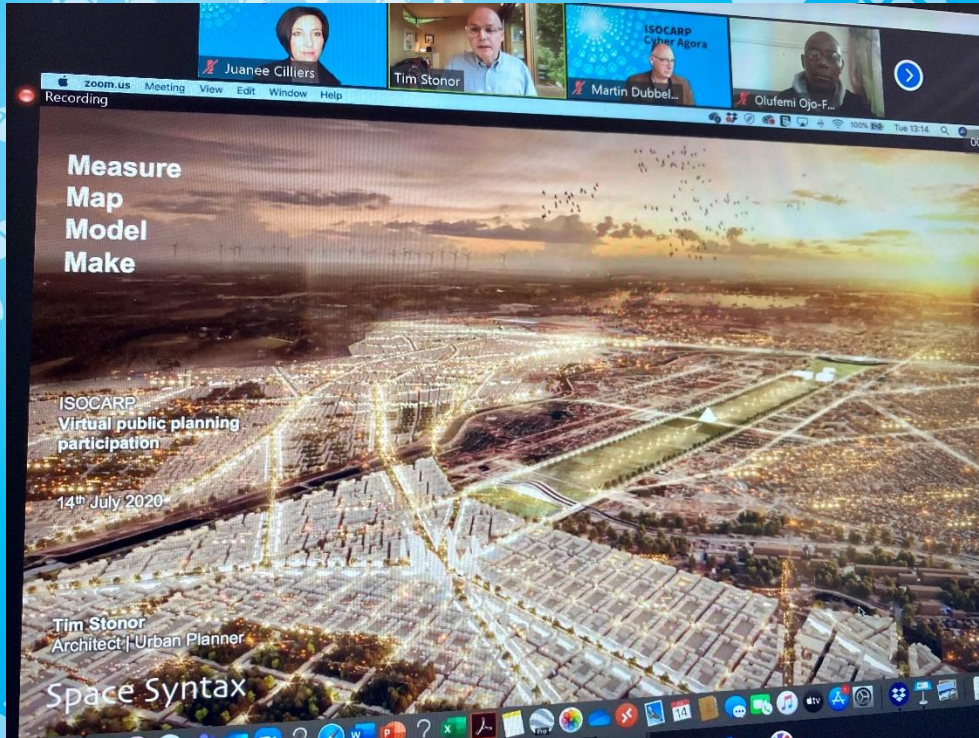

“If we continue with virtual meetings and internet capabilities, what implication will this have regarding the university facilities, thus will remote education be the new academic space that replaces the campus?”

ISOCARP Cyber Agora

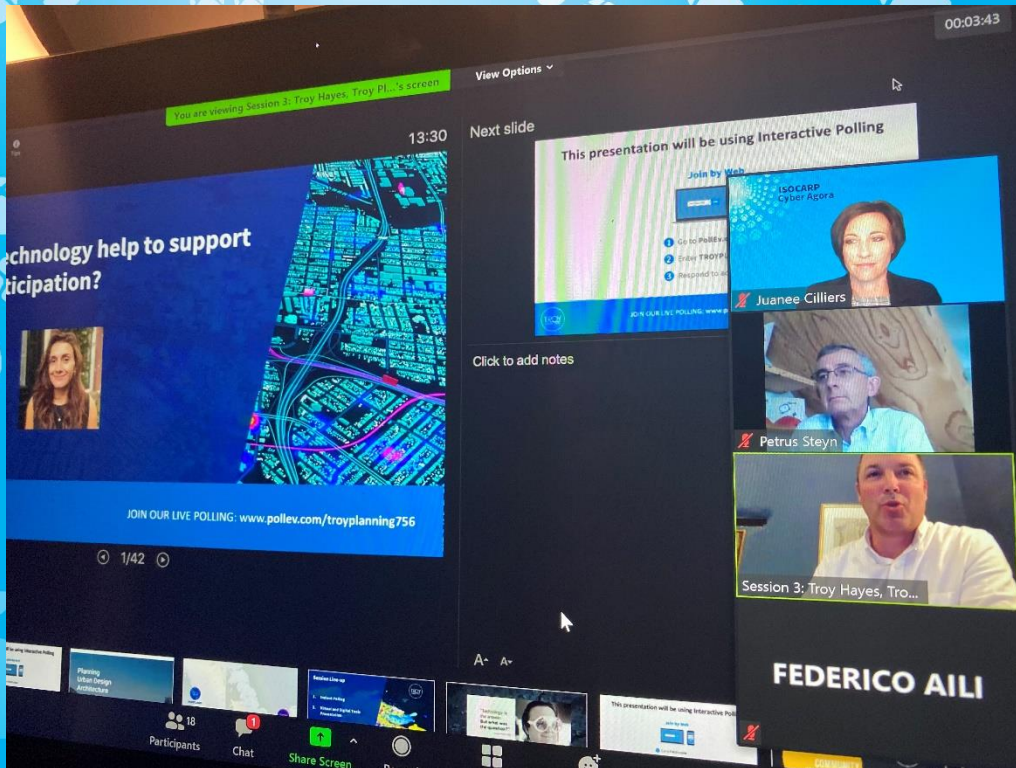

*“How to reach and empower
indigenous and marginalized sector
in participatory planning?”*

ISOCARP Cyber Agora

“Does virtual planning reinforce social categories of inequality, and to what extent? Meaning those who don't have internet capabilities cannot necessarily participate or voice their opinion on how the virtual planning of a city might influence their life.”

ISOCARP Cyber Agora

“Are we in a sense creating a new virtual society of 'elite' where only those who can participate make the important decisions. Or does this society perhaps already exist, and we just shifted to an internet platform without changing any power dynamics and continue with an exploitive system?”
